

Microwave Erase Directions

1

Your microwave must contain a rotating glass turntable. Ensure your Wave can safely spin without hitting the microwave walls.

2

Fill a coffee mug 3/4ths full with water.

3

Place your Wave into the microwave with the front facing up. Then place the mug inside the blue circles near the center of your book.

4

Microwave your Wave until the blue rocket logo inside the white circle disappears. Look through the window or open the door every 30 seconds to check. STOP when you see the change!

5

Flip your Wave over and repeat steps #3 and #4 with the back facing up. Use caution. The Wave and mug may be hot.

6

Allow the Wave to cool for 3 minutes before touching. The Wave and mug may be very hot! Allow the blue rocket logo to re-appear.
